LIGHT DISTRIBUTION	DIRECT
MATERIALS	ALUMINIUM
OPTIC	CLEAR

The REGA is a no frills performance architectural LED downlight and sometimes you just need that. With two sizes to choose from, Rega can be either a perfectly neat downlight at 130 mm diameter or a more substantial light source at 195 mm diameter.

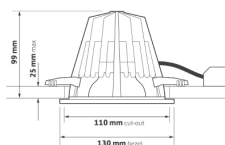

Whether you are after a neat downlight for circulation spaces or back of the house areas or a more punchier light source for spaces with high ceilings, Rega can do both. Across these two sizes, light outputs range from 1000lm up to 3000lm, as well as a Tunable white variant allowing this downlight to be specified in a large number of environments.
